Login

- Login Page appears when program starts.
- If username is admin, it will be directed to the **admin dashboard**.
- If there is a valid user, it will be directed to the **dashboard**.
- If the user is not registered, it won't allow the user to login and will stay on the login page.

2. Admin Dashboard

The image shows a mockup of an Admin Dashboard. At the top center is the title "Admin Dashboard". In the top right corner is a "Logout" button. On the left side, there is a form with the label "Enter username" followed by a text input field. Below the input field are three buttons: "Create User", "Delete User", and "List User". To the right of the form is a large, empty rectangular box, likely intended for displaying a list of users.

- A list of users will be presented in a list view.
- Create User - Allows admin to create a user
- Delete User - Deletes a user from the system
- Logout - Logs the admin out of their account and returns to login page without exiting application.
